- Procedural knowledge that creates teachers for different levels of school education skills that are specific to one's chosen specialization

The School Internship component is spread in all four semesters of the B.Ed. Training. In the first Semester the College develops the Microteaching Skills and Simulation among the trainees.

In the second semester the College gives a practical experience of real class room teaching through the component like Practice Teaching.

In semester three the College sends the trainees for Internship where the trainees spends four weeks and try to develop a thorough understanding of actual school life of a teacher. Staying in the school and doing all teaching and administrative duties help a trainee to prepare the trainees for a future life of a teacher. The trainees here, besides teaching try to develop a rapport with the teacher, principal clerks etc. They also study different registers and records which are maintained in any school.

In all these practical components the trainees try to develop skills, competencies needed for teaching in his/her chosen subject/methods.
