Next Gen

Approaches to Teaching & Learning

“ Teaching and learning today has entered the era of MALL- Mobile Assisted Language Learning. The concept of Network Teacher is also on the rise. This conference will focus on these two aspects of Teaching and Learning process. ”

Next Gen

Approaches to Teaching & Learning

In teaching and learning process the students were considered as “blank slates, empty vessels, wet clay” whose primary role was to submissively accept the information through lectures.

The teachers were considered as “a writer of the slate” whose primary role was to pass knowledge to the students. This model of teaching and learning was totally based on assessments of the students by the teachers.

Now, the concept of a sage on the stage has been transformed to a networked teacher due to the nexus of networks and it has become an art which can be always improved or enhanced by imbibing new and creative ideas. We have accepted teaching and learning through computers which has been changed into Mobile Assisted Language Learning popularly known as MALL. This conference will open many vistas in the field of Teaching and Learning in the new age of 4G internet technology.
